PROFESSIONAL SUMMARY

Passionate developer with a background in web and mobile development and 4 years of React experience. Adaptable fast-learner with a knack for picking up tools and concepts quickly and writing correct and clean code.

EXPERIENCE

Junior Full-Stack Developer, MyBusyBee Inc.
March 2024 – present

- Developed web applications using PHP, Javascript, MySQL and a brand new proprietary framework.
- Helped pioneer the usage of a new framework and adapted older Laravel projects to the new framework

Mobile Application Developer Intern (Assistant Team Leader), LexMeet Inc.
September – October 2022

- Designed and developed a major feature for a mobile application using **Figma** and **React Native**.
- Adapted an existing desktop web design into a mobile application design.
- Increased productivity and intern knowledge by organizing a **React** and **React Native** tutorial and providing guidance throughout the internship.

EDUCATION

Bachelor in Science, Computer Science - *Polytechnic University of the Philippines, Sta. Mesa*
September 2023

- **Award: Cum Laude**
- **Relevant Coursework**: Software Engineering, Web Development, E-Commerce, Data Structures and Algorithms, Object-Oriented Programming
- **Project: Automatic Travel Route Planner** *(Front-end developer)*
  - Utilizes the Google Maps API to find the most efficient route for several destinations using brute force and repetitive nearest neighbor algorithm.
  - **Technologies:** React, Google Maps API
  - https://travel-route-planner-315906.web.app/
- **Project: Astra-Tech Sample E-Commerce site** *(Full-stack / Sole Developer)*

- A sample e-commerce site aimed at selling mobile phones and accessories. Also has functionality to post tech-related articles.
- Employs user authentication and cloud functions.
- **Technologies:** React, NodeJs, Firebase
- https://astra-tech-store.web.app/

SKILLS

Javascript, Typescript, React, React Native, Next.js, Astro.js, NodeJs, PHP, Git, Github, SQL, HTML, CSS, RESTful API, GraphQL, Tailwind CSS

PERSONAL PROJECTS

- **Anime Recommendation App** *(Front-end / Sole Developer)*
  - Utilizes AniList APIv2 (GraphQL) for searching anime and manga, and for generating recommendations.
  - **Technologies:** React, GraphQL, TypeScript, Tailwind CSS
